

Wireless Connection Guide

EduRoam

Charles Sturt University is a participating institution in Education Roaming (EduRoam). If you are from a University that also offers EduRoam, feel free to connect using your own University's credentials by selecting **eduroam** when connecting to Wi-Fi on your device.

To access CSUconnect

1. View the available wireless networks using your device.
2. Connect to **install-CSUconnect**. Your connection will be accepted without prompting for any credentials.
3. Launch a web browser on your device and attempt to access a web page. You will then be automatically re-directed to the configuration wizard at <http://wireless.csu.edu.au>.
4. Follow the instructions. Enter the conference account details:

Username: segra **Password:** Kate2015 when prompted.

If you prefer, you can manually configure your device using the settings below, however we strongly recommend you use the [configuration wizard](#).

CSUconnect Manual Settings

SSID	CSUconnect
Security type	WPA2(enterprise)
Encryption type	AES
Network authentication method	Protected EAP (PEAP)
PEAP inner authentication method	Secured Password (EAP-MSCHAP v2)
Validate server certificate	Off

I need help!

If you have any concerns, queries or problems connecting to the wireless/internet, please see the Conference IT Desk in Buildings 1411 and 1413 or contact the IT Service Desk on 1300 653 088 or internally on x84357 and press 1 for the high priority support line.
